# RECRÍA

## *Protein and vitamin- mineral supplement for horses*

Derby Recría is a protein and vitamin-mineral supplement. Designed to provide high quality energy, amino acids, vitamins and minerals with excellent digestibility.

The period from birth to 24 months of life is critical in the development of foals. During this time they reach 90% of their height and more than 85% of their adult weight.

It is the product of the line that is used to improve the nutritional status of animals of any category.

It is indicated for use in pregnant and lactating mares at a rate of 1 to 3 kg per day alone or with the addition of oat grain.

In weaned or older foals, 1 to 2 kg per day is offered alone or with the addition of oat grain.

In animals in training or exposure can be given between 1 to 3 kg per day.

In all cases that a concentrated ration is added, a minimum daily consumption of 1 kg (DM) of fodder is recommended for every 100 kg of live weight and free access to fresh clean water.

Presentation: 25 Kg Poly paper Bags.
