## ***Protein Supplement for horses***

Derby DESTETE is a supplement with high protein content based in extruded soy. Soy's amino acids make this product an excellent nutrient source for young animals as well as any other category that need a strong proteinboost of optimal quality.

Contains vegetable oils that provide the energy needed to complement the protein intake. In addition to this, a vitamin-mineral concentrated nuclei that, in a 500 gr daily dose meets the trace minerals and vitamins requirements in weaned foals.

It can be used in different categories, as long as they have access to forage and fresh water.

In order to improve future weaning conditions on suckling foals that have experienced slow growth, 500 gr per day can be given to them.

On weaning and older foals, it can be used as a complement of oat in cases when it is pretended to achieve an optimal development in precocious horses (Shows and breaking). 1 Kilo per day is recommended.

Presentation: 25 Kg Poly paper Bags.
